

The advancement in technology, especially Internet and Information Technology has led to new ways of doing business in banking. These technologies have cut down time, working simultaneously on different issues and increasing efficiency. The core banking software is installed at different branches of bank and then interconnected by means of communication lines like telephones, satellite, internet etc.

### Overview

C-Edge has innovated Comprehensive Core Banking Services, on an outsourced Application Service Provider (ASP) model to enable your bank to integrate all your branches and have a single view of the bank for effective management and control. It combines IT services, networking and core banking application infrastructure in a bundle, which helps you to run your bank efficiently and in a cost-effective manner.

Core Banking Solution that C-Edge offers on ASP is B@NCS Software, an internationally renowned solution already adopted by 116 banks in 35 countries, including India, where it forms core of State Bank of India and its 6 Associates Banks' domestic banking. This service has been customized to meet the specific requirements of Urban, District Co-operative Banks and Regional Rural Banks in India.

**C-Edge Technologies Ltd is a leading Technology, Infrastructure and Service provider to financial institutions in India and abroad.**

C-Edge is a joint venture, between Tata Consultancy Services Ltd. (TCS) and State Bank of India (SBI), to provide transformational capability to the Indian financial services and emerging markets by addressing major technology needs of this industry. We are an integrated solutions provider and have created a niche market for ourselves, in India and abroad, by leveraging the technical and domain competencies of both our parent companies. The rich heritage possessed by our parents has given us many innate advantages resulting in tangible benefits for the banks we serve.
